This well-known and long-established Periodical will enter upon its 56th volume in February, 1857. It will be issued weekly, as heretofore, from the office of Publication, **over 184 Washington Street, Boston,** and in its editorial management, the chief duties and responsibilities will continue to be performed by two physicians of the city, who have been selected as fully qualified by their literary tastes and scientific attainments to make the Journal acceptable to the profession generally. Aid is also now freely given by many of the leading physicians of Boston, and it will continue to receive contributions from eminent members of the profession in every part of the country. Its contents, though mainly of a practical character, are intended to be sufficiently varied to make its weekly visits interesting as well as useful to the medical practitioner.

HAY CUTTERS,

Manufactured and for sale by

HIRAM BLACKMER,

34 North Market Street, Boston.

The subscriber takes pleasure in announcing that he is still engaged in the sale of the unrivalled SELF-SHARPENING HAY CUTTER, which has been pronounced by those who have had the best opportunity to examine and test it, SUPERIOR to every other Cutter in use.

PATENT PUMP CHAIN TUBING.

The Subscriber invites public attention to a new and valuable improvement in the method of making Chain Pump Tubing. This Tubing is made by boring through solid timber, and so matched together that a tube of any length can be easily made, and of great durability. Farmers will find it for their interest to examine this Tubing, as it is intended to be used not only for Chain Pumps, but for aqueduct pipes, being made water-tight by painting the joints. It can be afforded at a much less price than Lead Pipe, and is full as durable, being made from small joists, which soon become saturated with water, and consequently last much longer than large logs in the ground.

PATENT WAX-THREAD

SEWING MACHINES,

Secured by Patents issued April 19, 1853, *July* 4, 1854, *and August* 22, 1854.

They are the best ever invented—original and novel in their construction, made in the most perfect manner, not liable to get out of order, and, by a new improvement, sew with Shoemakers' Wax, making the work stronger, better, and more durable than hand-sewing—using an AWL to perforate the leather, before the needle passes through it with the thread, leaving a FAIR STITCH, thus making them INVALUABLE on all kinds of lapped seams, and for stitching Oxford and Congress Boots. They will sew the thickest kind of every description of heavy work, without breaking Needles—and by changing the Awl and Needle for smaller sizes, will make the most elegant fancy work with silk or fine thread, thereby combining in the same Machine all the requisites for every kind of sewing.

THE NEW CLAMP MACHINES,

FOR SIDING THE HEAVIEST THICK to the FINEST CALF BOOTS, have been recently perfected, and by using Shoemakers' Wax, make work superior to hand-sewing. They work with great rapidity, and any person, of either sex, twelve to sixteen years of age, with ordinary skill, after a few days' experience, can side eight to twelve cases of Boots per day, thereby earning eight to twelve dollars daily, depending upon the kind of work. They run very easily; in fact, all the objections to former Wax-Thread Sewing Machines are obviated, and to be fully appreciated they must be seen, and also the work.

EXCLUSIVE RIGHTS TO USE AND SELL SAID MACHINES

Can be secured, if applied for soon, for States, Counties and Towns, on terms that will afford purchasers great profit.

THREE ENGLISH AND FRENCH PATENTS FOR WAX-THREAD SEWING MACHINES

Also for Sale, on terms which will afford

FORTUNES TO PURCHASERS.

Those wishing to see the most beautiful, perfect and durable work ever made, and see these new and extremely valuable labor-saving Machines in operation, are invited to call at

MASSACHUSETTS LEGISLATURE.

The session of the General Court for the year 1856 was begun at the State House, in Boston, on Wednesday, the second day of January — being the first Wednesday; and was prorogued on Friday, the sixth day of June. At this session, 310 Acts and 103 Resolves were passed.

The titles of the Acts and Resolves are given below *in full*. The letter [G] is placed before such as are designated as *General* Acts and Resolves by the Secretary of the Commonwealth. The numbers placed before the titles show the order of their approval by the Governor, and indicate in each case the chapter which the Act or Resolve makes in the official code for the year 1856. The date, after the title, is the time of the approval by the Governor.

The letter [P], placed at the end, shows that the act is to take effect from and after its *passage*, which is considered as cotemporaneous with its approval by the Governor. All other Acts and Resolves, in accordance with the general provisions of the Revised Statutes, take effect on the thirtieth day after their passage, unless some other time is expressly mentioned in the Act.

MASSACHUSETTS MILITIA.

Corrected in January, 1857.

The Militia of Massachusetts is divided into two classes, the active and enrolled; the latter consists of all "able-bodied white male citizens of the age of eighteen years, and under that of forty five, excepting persons enlisted into volunteer companies, and persons exempted by law, or incapacitated by physical and other causes." [See sec. 5. Militia law.] The whole number enrolled in 1856, as appears from the Returns of Assessors of cities and towns, (whose duty it is to make such returns.) is 147,976, being an increase of 6,784 over last year.

The Active Militia consists of Volunteers, who are paid a per diem allowance when on duty, amounting, in the whole, to $9 per annum, each man of the Artillery, Infantry and Riflemen, and $18 each for Cavalry. They consist, by the returns of 1856, of about 7000 men. These are organized into three Divisions and six Brigades, embracing two Divisionary Corps of Cadets, one Company of Light Artillery, five Companies of Cavalry, and twelve Regiments and one Battalion of Infantry, and two Battallions of Riflemen—in all, 106 companies.

The first division is made up of Militia in Suffolk, Norfolk, Plymouth, Bristol, Barnstable, Nantucket, and Dukes counties; the second, of Militia in Middlesex and Essex; the third, of Militia in Worcester, Hampshire, Hampden, Franklin, Berkshire.

RAILROADS.

Previous to January 1, 1856, there had been acts of Incorporation granted to seventy-two Railroads in Massachusetts, with an aggregate capital of sixty-two millions six hundred thousand and one hundred dollars ($62,600,100.00). Of these four were street railways with an aggregate capital of six hundred and twenty-five thousand dollars. Fifty-four roads were in operation, and their construction had cost over sixty-nine millions. They had an aggregate length of track of fourteen hundred and fifty-three miles; of double track, about three hundred miles; and of branches, over one hundred and thirty miles. The greatest speed adopted by passenger trains on any of these roads was twenty-eight miles per hour, but the usual speed was about twenty-five miles. The total expense of working these roads for the year 1855 was near seven millions of dollars; their net earnings for the same time about three and one-half millions; and amount of dividends declared, one and one-half millions.

One hundred and eleven persons were injured by accidents; seventy-three fatally.

At the session of the General Court in 1856, three other railroads were incorporated as follows: — Springfield and Farmington Valley R. R. Co., Malden and Melrose R. R. Co., and W. Roxbury R. R. Co.

All births, marriages, and deaths which take place in the city, are by law required to be returned to this office, to be recorded, with various particulars in regard to each.

It is important that this law should be strictly carried into effect; to the public, that the health and condition of the population may be known; and to every individual, that evidence may be furnished by the records of the three great events of life—birth, marriage, and death. Great personal inconvenience and pecuniary loss have often arisen from want of this evidence.

The city is canvassed in May, and again in January, in order to collect the proper information concerning children born during the year.

During the year 1856, five thousand nine hundred and twenty-two births were registered.

Intentions of marriage of two thousand nine hundred and thirteen couples were entered, and certificates issued, and two thousand five hundred and thirty-six marriages were recorded.

Four thousand two hundred and fifty-three deaths, which occurred within the limits of the city, during the same period, were registered.

His instructions to the students of the Law School were embodied in his well-known "Introduction to American Law."

Dr. John Collns Warren, Boston. May 4, aged 77. He was born in born in Boston, Aug. 1, 1788, graduated at Cambridge in 1797, studied medicine with his father, Dr. John Warren, and spent several years in study in the hospitals of London and Paris. On his return he commenced practice in Boston, and soon attained the highest rank in his profession. He was appointed Assistant Professor of Anatomy and Surgery in Harvard College in 1806; and in 1815, on the death of his father, was made full Professor, and so continued until his resignation in 1847, from which time until his death he was Emeritus Professor. He was one of the originators of the Massachusetts General Hospital and McLean Asylum, and for nearly thirty-six years he was at first the sole, and subsequently the principal surgeon, in daily attendance upon its wards. He was President of the Massachusetts Medical Society from 1832 to 1836, when he declined a re-election. He was a member of various scientific and philosophical societies on both sides the water. During the later years of his life he devoted much of his time to the study of the Natural Sciences. His museum of specimens in comparative anatomy, osteology, and paleontology was very extensive; and he had, probably, the most perfect skeleton of the *Mastodon giganteus* of North America known to be in existence. He published and distributed at his own expense his work on the mastodon of this country, and issued an enlarged edition a few weeks before his death. In 1854 he published a "Genealogy of Warren."

Paul Willard, Esq., Charlestown. March 18, aged 60. Born in Lancaster, Mass., graduated at Cambridge in 1817, studied law in Worcester, was admitted to the bar in Middlesex in 1821, and opened an office in Charlestown. In 1822 he was appointed postmaster in Charlestown, and held that office for 7 years. In 1823 he was elected Clerk of the State Senate, and was re-elected for seven successive years. He was intrusted by his fellow citizens with various municipal offices.

Hon. Sidney Willard, Cambridge. Dec. 6, aged 76. Born in Beverly, graduated at Harvard College in 1798 and commenced the study of theology in Cambridge under the instruction of the Hollis Professor of Divinity. In 1800 he was elected Librarian at the College, which office he held five years, and having completed his studies was licensed as a preacher and preached in various places. In 1807 he became Hancock Professor of Hebrew and other oriental languages in Harvard College. This office he held until 1831, discharging its duties with great fidelity and ability.

He was for two or three years mayor of the city of Cambridge.

Capt. Joseph R. Winn, Lynn. Feb. 25, aged 71. One of the Dartmoor Prisoners in the war of 1812.

A NEW AND VALUABLE INVENTION

IN

HEATING APPARATUS.

It has long been supposed that a large proportion of the fuel consumed for the general purposes of generating heat has been lost or wasted in passing off into the atmosphere in a crude or unconsumed state, in the form of smoke and gases; but as our ancestors did, so have we *continued* to do,—viz., construct apparatus for merely burning fuel, without consulting the laws of Nature in reference to the application of heat to the heating surface, so as not only to consume the combustible properties in the smoke and gases, but to hold them suspended over the fire to the direct action of the light and rays of heat from the fire-chamber, until the whole fuel consumed is made to impart its heat before it is suffered to escape into the atmosphere.

Mr. Gardner Chilson, of the firm of Chilson, Gould & Co., Nos. 99 & 101 Blackstone street, Boston, has succeeded, after several years' study and experimenting, in producing a new and highly valuable invention for constructing all kinds of heating apparatus, for either steam, hot water, hot-air furnaces, stoves, ranges, &c. From many satisfactory experiments, in which his invention has been thoroughly tested, it is fair to conclude, if not promise, that at least a saving of fifty per cent. in fuel over the common mode can be made by it.

This invention was patented by Mr. Chilson in the United States, Sept. 26, 1854; in England, May 26, 1854; and in France, June 14, 1854. It is well known that Mr. Chilson has been a successful inventor for many years, and has done much to improve the mode of heating apparatus for various purposes. Many public and private buildings throughout the country are indebted to Mr. Chilson for a healthful, economical and durable plan for warming and ventilation. A constant personal attention to the subject has crowned his labors with remarkable success. Stimulated by his success he has spared no pains or expense in making further researches into the causes of the consumption of fuel and its effects applicable to heating surfaces; and some five years since he discovered a new principle for burning fuel and generating heat, which will, when fully developed, tend to revolutionize the world in the manufacture of heating apparatus for all general purposes. Although discovered some eight years since, yet it was not until quite recently brought to that state of perfection to warrant him in announcing it to the world. The first form or plan of this principle brought out, was what is known as Chilson's Patent Trio, or, as some call it, the "Elephant Stove." We know of no more comprehensive way of describing and explaining this stove, than to copy a notice of the Stove and Portable Furnace constructed on the same principle, published in the Boston Atlas, Dec., 1854.

"ECONOMY IN FUEL.—It has long been the study of the manufacturers of stoves, furnaces and other warming apparatus, how they could turn to the best account the large amount of unconsumed or half consumed fuel, which is known to pass off in the form of smoke and gas, into the smoke pipes. Invention after invention has sought to diminish this waste, and to increase the proportion made available in increased caloric. Among those which have proved to be most successful may be mentioned some of Mr. Chilson's inventions, and among them we would particularly notice the Trio, or so-called Elephant Stove, and also his portable furnaces on the same principle.

We have enjoyed the benefits of one of these stoves in our counting-room for two years, but as there are so many new inventions in furnaces and stoves, we have not been in haste to express our opinion, until we could fully test the success of this invention. We can now speak decidedly in its favor, and any one who examines its successful operation at our counting-room in State street, will need only his own senses to assure him that we award to it no undeserved approval. We can also speak from experience, with high approval of Mr. Chilson's Trio Portable Furnace, on the same principle. We now have one of these in our dwelling, taking the place of one found insufficient to warm the building, and removed to give place for the Trio. The latter gives entire satisfaction, affording a thoroughly warmed house, which was not the case with the one removed, with the promise of a large saving of fuel.

That it depends entirely on the construction of heating apparatus to secure the greatest possible amount of heat from the fuel consumed, there cannot be a doubt. We have had sufficient experience in this matter in years past, by the use of stoves and furnaces, to satisfy us of the unnecessary waste of fuel. The radiating surface is usually too small, and of such form as to allow the smoke and gases to pass off too quickly unconsumed to the chimney. It is thus totally lost. This has been caused by the want of a suitable radiating surface, so constructed as to hold the smoke and gases in such a position as to cause them to become highly heated, and thereby thoroughly consumed, and impart their heat before leaving the radiator. Mr. Chilson's invention has succeeded in securing this desirble object, in the saving of fifty per cent. in fuel, and giving us thoroughly warmed rooms, and withal a fresh, healthful warmth.

We would describe the form and operation of the stove, say one of the medium size, to be that of a long, tapering trunk or cone, fifteen feet long, fifteen inches diameter at base, and two inches diameter at top; this long cone may be supposed to be bent so as to form three perpendicular branches—which is the supposed reason for its name Trio. Just beyond the first bend is a collar, to which is attached the smoke pipe, and in this collar is fixed a damper, and in the same collar is an opening just large enough to let in the small end of the tapering trunk.

In kindling the fire the damper is opened just long enough for the fuel to ignite. It is then fully closed for the day. The only escape for the smoke and gases is through the whole circuit of the long tapering trunk, and they are discharged out of the small end of the trunk into the before named collar, and thence into the smoke pipe. Thus, when the damper is closed, the smoke and gases are confined in this trunk, and exposed to so high a heat from the direct rays and action of the fire, as to cause the heated current to continually impinge against the whole of its large surface, quite exhausting the heat from the fuel, and using the formerly wasted smoke and gases for generating a powerful heat, and greatly economizing the use of fuel for warming purposes.

A much more satisfactory idea can be formed of the principles of the stove from personal inspection, than from any description that can be given. The experience of two years enables us to speak with knowledge of its excellence."—*Boston Atlas.*

The invention spoken of at the head of this article, has many valuable improvements over the Trio. We will attempt to describe this invention:—When applicable to a steam or hot water boiler, the fire chamber is broad and shallow; directly over, and resting on the edges of the fire-chamber, is one broad cone or radiator, terminating at or nearly at a point some four feet above the box; out of this main cone are as many small cones as can well enter the main cone, which when completed resembles a pyramid of cones. This pyramid of cones is surmounted by a large circular chamber, into which the outside series of cones enter for drawing off equally the non-combustible products of combustion, and what escape heat there is, from the cones, where it is distributed through the circular chamber and becomes fully exhausted before escaping to the chimney.

The wonderful economy in the consumption of fuel, and the great power of generating heat, are caused mainly by holding a large amount of heated smoke and gases suspended in a large number of cones directly over the fire box. The continuous taper of these cones so reduces the whole amount of area at their terminus on entering the circular chambers, as to make the combined area about equal to that of the escape smoke pipe at the centre of the circular chamber; thus preventing the products of combustion from escaping until they part with all that is combustible, which is thoroughly done by the direct action of the rays of light and heat being brought to bear upon the heated smoke and gases confined in the cones; and by thus highly heating the gases they become luminous and reflect their rays of light and heat not only up the cones, but also downward to the bases of the semi-cones and on to the top of the fuel in the fire box, thus fully consuming every thing that is combustible in the fuel,

The action of heat brought to bear or impinge against these cones, is not unlike the action of the light and rays of the sun brought to bear on the sun glass, when its rays are brought to a focus, or the power of the blow-pipe to produce an intense heat by concentrating the wind to a focus. Notwithstanding the small contracted openings at the terminus of the cones, the draft is sure to be good; owing to the intense heat in the cones, the small jets of heat that escape into the circular chambers suffice to keep it warm, and insure a good draft without the waste of fuel.

This invention is now used for various purposes, and the public can decide whether these remarks are exaggerated or not. See Advertisement inside first cover.

STATE PRINTER,

PRINTER,

Spring Lane, Corner of Devonshire Street, BOSTON.

(Over the Boston Type and Stereotype Foundry.)

This is one of the most extensive Printing Establishments in New England, and it has recently been NEWLY FURNISHED with Type of various descriptions, cast in the United States and Europe, requisite to a complete Printing Office.

The Presses, which are run by Steam, are new, and of the most improved construction, and comprise a variety of patterns recently invented, calculated to execute work well and fast.

Attention is called to three new and beautiful REVOLVING-CYLINDER PRESSES, manufactured by Messrs. HOE & CO., of New York, expressly for Job Printing, which give, in style and clearness, impressions far superior to any other machine now in use, enabling us to furnish this part of our work at nearly one-half the former prices. CARD PRINTING, in a neat and thorough manner.

PRINTING IN COLORS.

Mr. WHITE has the *exclusive right* to use the valuable patent in New England, by which *all* the COLORS are printed on the sheet at ONE IMPRESSION. This new method will no doubt be generally used for printing all BILLS designed to attract public attention, as the expense is but a trifle more than the cost, under the usual process, of a single color.

Those in want of Printing are invited to call and examine.

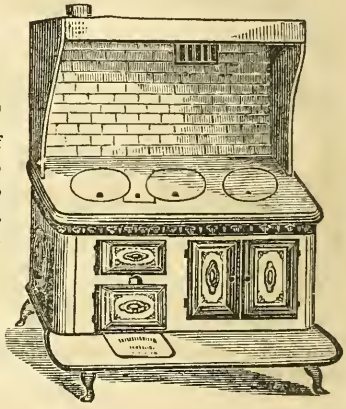
CHAMPION

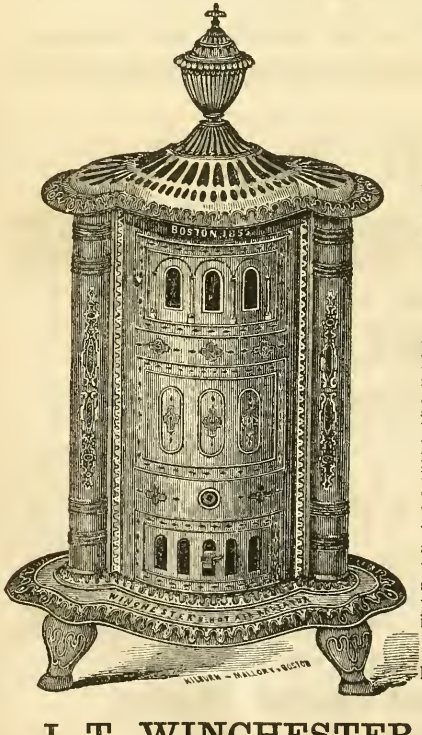
DOUBLE OVEN COOKING RANGE.

The above range we offer to the public, with full assurance that it cannot be surpassed. The ovens are on either side of Fire Chamber, convenient to get at, and large size, and warranted to bake perfectly with a moderate consumption of fuel. Either oven may be used separately when desired, and at the same time the other will be in fine condition for keeping food warm, or they can be set with only one oven, if desired. Hot water and hot-air fixtures for the Champion, are of the most powerful character. There are seven sizes, adapted to all classes of families, from the smallest private family to the largest public house. Prices low, and perfect operation guaranteed.

Portable Champion Range.

This is a new Portable Range which excels anything of its kind in Market, just the article for those families who want the advantages of a set Range, but do not want to incur so great an expense as is necessary in brick Ranges, or, as is the case very often, have not a fit place to set a brick Range. Of these there are three sizes.





HOT AIR RADIATOR.

This stove was introduced last season, and some eight hundred of them sold, which, with scarce an exception, gave entire satisfaction, notwithstanding we had one of the severest winters to test the virtue of heating apparatus ever experienced. It is on the hot-air furnace principle, not only giving the entire benefit of the heat created by the fuel, but constantly receiving into the air chamber the cold air from the room, and after it becomes rarefied, passing it back into the room. It can be arranged for heating the room where it may stand, and likewise a room over it, and we can refer to a good number who have used them in that manner, with entire satisfaction, during the last winter. Having made some improvements, and added another size, making four sizes in all, we now offer to the public the Hot Air Radiator, knowing that, considered in all points, it is the most desirable stove for parlor, sitting-room, office, store, school-house, banking rooms, &c., that can be found.

Also, Cooking Stoves, and various other patterns of parlor and store stoves of the most approved patterns.

He would say that his facilities for the sale of property of this description are unsurpassed by those of any one in the State; and persons having Real Estate of any kind, which they would like to dispose of, will please call on him, or forward to his Office *full, accurate, and correct descriptions* of the property, which will be entered on his books. If owners wish to have their property ADVERTISED, and extra pains taken to dispose of the same, it will be punctually attended to, on the most reasonable terms.

GOWARD'S REAL ESTATE REGISTER,

The most comprehensive and perfect paper of its kind in the United States, is published at this office every Saturday. Terms, Two Dollars per annum, in advance.

In addition to its value as the BEST MEDIUM BETWEEN BUYERS AND SELLERS OF REAL ESTATE, it commends itself to all business interests, as a most valuable and useful publication, many features being introduced peculiar to it, and not to be found in any other paper in the country.

THE BOSTON JOURNAL,

PUBLISHED DAILY, SEMI-WEEKLY AND WEEKLY.

TERMS:

DAILY, in advance, - - Six Dollars a year. | SEMI-WEEKLY, - - Four Dollars a year.
SINGLE COPIES, - - - - - Two Cents. | WEEKLY, - - - - - Two Dollars a year.

[Club Prices.—2 copies, $3; 5 copies, $6; 10 copies, (and one to getter up of Club,) $10; 20 copies, and two to getter up of Club, $20.]

JOURNAL FOR CALIFORNIA, - - - - - - - - - - - Six Cents a copy.

The Proprietor of the BOSTON JOURNAL, some years since, adopted the low price cash plan in the circulation of that paper, and has met with a success beyond his anticipations. Convinced that this course is the most profitable, he is determined to adhere to the system, and although the expenses of publishing a newspaper have increased enormously within a few years, the subscription and cash prices of the DAILY, SEMI-WEEKLY, WEEKLY and CALIFORNIA JOURNAL, will remain as above named; while no expenditure of money, time or labor will be spared to keep the Journal in advance of all its cotemporaries, in every point which goes to make up a Live Newspaper of the present day.

THE DAILY JOURNAL,

Although furnished at the low rate of TWO CENTS a copy, contains MORE READING MATTER than any other daily paper in Boston. It is published

MORNING AND EVENING,

and either edition is sure to contain the VERY LATEST NEWS received by the MAILS and TELEGRAPH, to the moment of publication. It is the determination of the Proprietor to make it emphatically and in every sense of the word a NEWSPAPER! and as such it will report and record the doings of all parties and sects. It will give full and complete reports of the state of the Markets; a full and accurate Shipping List; doings at the Stock Exchange; and Money Articles from a competent source; full reports of the Debates in Congress; able reports of all Lectures of interest; full and complete accounts of Public meetings, with *verbatim* reports of the Speeches, when the occasion requires, &c., &c. Indeed, the reader of the DAILY JOURNAL may be sure of finding a record of everything of general interest which transpires either at home or abroad. By arrangements made to establish EXTENSIVE CORRESPONDENCE, and by a liberal use of the MAGNETIC TELEGRAPH, the Journal will at all times be in possession of the LATEST NEWS; and by the publication of a complete paper, both MORNING AND EVENING, the Proprietor is enabled to send by

EVERY MAIL AND EXPRESS

which leaves the city during the day, thus furnishing the news not unfrequently from 12 to 24 hours in advance of those papers which print only *one edition daily*. The JOURNAL is printed on one of HOE'S CELEBRATED SIX CYLINDER FAST PRESSES, capable of printing FIFTEEN THOUSAND AN HOUR; and we are thus enabled to *wait for news until the latest moment*, and still supply the demand, however large.

This is *the only press of the kind in New England*, and is well worthy an inspection by those who would learn the immense improvement made in the art of printing. Its introduction in the JOURNAL ESTABLISHMENT involved an outlay of over

TWENTY THOUSAND DOLLARS,

and was rendered absolutely necessary by a large and constantly increasing circulation—a circulation which, as an ADVERTISING MEDIUM, IS UNEQUALLED IN NEW ENGLAND.

☞ Either edition will be mailed or sent by Express, at the rates mentioned above, for any length of time the subscriber may wish. It is delivered by faithful carriers in all parts of Boston and adjoining cities, both Morning and Evening, and is for sale at the Periodical Depots, and in all the large towns and cities on the lines of the Railroads throughout New England.

TO ADVERTISERS.

Advertisements are inserted at fair prices, in clear type, set up in uniform style, and arranged under appropriate heads, so as to attract the attention in the readiest manner. The great value of the JOURNAL as an advertising medium may be inferred from the fact that ALL ADVERTISEMENTS APPEAR IN BOTH MORNING and EVENING PAPERS *without any* EXTRA CHARGE! thus securing to advertisers the benefit of TWO papers at ONE price, and

DOUBLE THE CIRCULATION

of any subscription or two cent paper in New England. Advertisements inserted in the WEEKLY, SEMI-WEEKLY, or CALIFORNIA JOURNAL, will be subject to additional charge for each paper.

☞ All orders for either of the above papers, or for advertising, should be accompanied by the cash, and addressed to the Publisher,

CHARLES O. ROGERS,

BOSTON DAILY ADVERTISER.

ESTABLISHED MARCH 1, 1814.

Published every Morning, except Sundays. Terms, Eight Dollars per annum, in advance.

NATHAN HALE AND CHARLES HALE, EDITORS.

CHARLES HALE, PUBLISHER.

This is a first-class newspaper of the largest size published in Boston. It is conducted with care and diligence, and is believed to possess a favorable character wherever it is known. With the introduction of the new type, a new order of arranging the contents has been adopted, which allows of a considerable increase in the quantity of reading matter, and enables us to present the news as received at the latest hour, in the fullest extent, without inconvenience, and without curtailing the space devoted to the various regular departments of intelligence. While retaining all the old characteristics of the paper, which have given it its favorable reputation, such new features have been and will be introduced as shall make it approach as nearly as possible the highest standard of excellence for a daily newspaper published at the present day in the capital of New England.

Every effort is used to present in the columns of the BOSTON DAILY ADVERTISER the *news* of the day, with fulness, freshness, and accuracy, and, further, to discuss the topics of the day freely, fairly and with independence, at the same time that the utmost care is taken to express no opinion which is not formed after careful personal examination by the editors, of the subject under consideration.

The attention of the public is respectfully called to the following characteristics of the BOSTON DAILY ADVERTISER:

1. Its editorial articles, which are numerous, written with care, and express only the opinions of the editors. *No pay is ever received for anything appearing as editorial.*
2. The regularity and fidelity with which all public documents and matters of permanent value are presented in its columns.
3. The copiousness of its summaries of foreign intelligence, which are prepared with laborious care from ample materials.
4. The perfection of its marine intelligence. Its leading position in this department is believed to be generally admitted without question.
5. The accuracy and independence of its financial and commercial intelligence, which is so prepared as to remove it beyond suspicion of aiding individual interests.
6. The accuracy and fulness of its reports of the proceedings of the Massachusetts Legislature, and of legal and judicial proceedings.
7. Its literary intelligence, and notices of books, pictures, public amusements, &c. Extracts from forthcoming works in advance of their publication are frequently printed in its columns.

Other features to which we invite the attention of the public are our special telegraphic despatches from Washington during the session of Congress, (additional to the regular despatches):—weekly statement of the value and amount of imports of foreign goods at the port of Boston, prepared exclusively for this paper (additional to the daily reports of the names of importers):—weekly statement of the condition of the banks in Boston, and monthly statement of the other banks in Massachusetts, published by authority in the Daily Advertiser and one other paper only. These statements are published also in the Semi-Weekly Advertiser and Weekly Messenger.

The SEMI-WEEKLY ADVERTISER and WEEKLY MESSENGER contain substantially the same reading matter as the DAILY ADVERTISER, but less space is occupied with advertisements, of which very few appear in the WEEKLY MESSENGER.

These papers are printed for mailing on a sheet weighing "not over 1½ ounces," and are accordingly chargeable for postage at the lowest rate, viz., *a quarter of a cent* for each paper within the State, when paid quarterly, in advance.

A quarter's subscription to the daily, *postage included*, thus costs but $2.20; to the semi-weekly, but $1.07; and the weekly, but 54 cents.

BOSTON DAILY ADVERTISER,

Office, 6 Congress Street, Boston.

[*From the "Recollections of a Life-Time," by S. G. Goodrich, (Peter Parley,) just now published, December, 1856.*]

The BOSTON DAILY ADVERTISER was founded in March, 1814, and Nathan Hale began his editorial career with it. It may be taken as the model of the highest class of newspapers in the United States—able, calm, sincere, wise and gentlemanly. It would be difficult to name a single journal in any country which, in a union of these qualities, takes rank above it. In the United States there are some which emulate it, but few, if any, which surpass it.

[*From the National Intelligencer.*]

The BOSTON DAILY ADVERTISER.—A paper so wise, so instructive, so cautious and so truthful, deserves every success; and its success is a credit to the community which it ably serves and enlightens.

[*From the Albany State Register.*]

The BOSTON DAILY ADVERTISER.—It is one of the very best newspapers in the United States, and we take the liberty of rejoicing in its prosperity.

[*From the New York Shipping List.*]

The BOSTON DAILY ADVERTISER.—The Daily has long since acquired the reputation of being the best marine journal in the country, and as a literary and political publication it ranks deservedly high.

[*From the Salem Gazette.*]

The BOSTON DAILY ADVERTISER—a journal of which it is not too much to say, that, in some respects, it has no equal on this side of the Atlantic.

[*From the Yarmouth Register.*]

The BOSTON DAILY ADVERTISER.—A glance at its columns will show that it is fully up to the mark, and its matter is evidently prepared with much care; while in one department, and an important one to Cape readers—we refer to the *shipping intelligence*—it unquestionably excels all its cotemporaries in the freshness and accuracy of its reports. This department is under the direction of Mr. J. A. Ballard, the best shipping reporter in the country.

[*From the Vineyard Gazette.*]

The BOSTON DAILY ADVERTISER has appeared in a new dress, and looks remarkably well. The "Advertiser" is unquestionably the best paper in Boston, and we rejoice at this renewed evidence of its prosperity.

THE BOSTON POST,

THE PRESS AND POST,

AND

THE BOSTON STATESMAN,

AND WEEKLY POST.

THE TERMS OF OUR JOURNALS PER YEAR ARE:—

For the DAILY POST, $8; for the PRESS AND POST, semi-weekly, (Mondays and Thursdays) $4; and for the STATESMAN AND WEEKLY POST, (Fridays) $2.

These journals are edited by CHARLES G. GREENE and RICHARD FROTHINGHAM, JR.; employ a large corps of assistant editors, reporters and correspondents; and neither labor nor expense is spared to make their columns valuable. They have been published nearly thirty years; have a range of subscription exceeded in extent and aggregate by no paper in New England.

The columns of these papers are filled with a great VARIETY of useful and entertaining matter. Their editorials; domestic and foreign correspondence; reports of lectures; marine department; daily monetary article and weekly financial review; literary notices; poetic contributions and humorous matter form a VARIETY designed to meet every taste.

The ADVERTISING COLUMNS embrace an almost entire synopsis of the business of New England; and from that department of the paper alone can be obtained a correct impression of the character of trade, its facilities and its operations; while the financial editorials give an accurate view of passing events in the commercial world.

The PRESS AND POST is made from the DAILY'S contents, and published every Monday and Thursday morning. It is clearly and handsomely printed on fine paper, in clear type, and the subscription is four dollars a year. This journal, with its ample prices current, and general view of the markets, together with a careful synopsis of news, miscellaneous intelligence, &c., is admirably adapted to answer the wants of country merchants, or readers out of Boston. To Clubs of ten or more, paid in advance, a reduction of twenty-five per cent. will be made.

THE BOSTON STATESMAN AND WEEKLY POST

Forms a racy and complete record of the times, and contains the news of every description; in fact, a brief and comprehensive history of passing events; foreign news in detail, domestic information, agricultural items, commercial and monetary articles, statements of trade, of the weather, of crops, &c.; accounts of meetings, political records, news of every description, poetry, pleasant reading matter, humorous items, epigrams; in fact, a COMPLETE FAMILY Newspaper—a vehicle for every species of useful and entertaining information—among which will be found, in each issue, A PLEASING STORY. The STATESMAN is printed on the LARGEST SIZED paper, and on new and beautiful type. It has a very large circulation, and its rapidly increasing list is the best evidence of its popularity. It is supplied at the rate of TWO DOLLARS a year for single subscriptions. CLUBS, *taking ten or more copies in one package*, will be supplied at ONE DOLLAR AND A HALF A YEAR.

THE COMMERCIAL DEPARTMENT

Of these journals involves a large expenditure; contains varied and accurate reports as to all branches of trade; and is second to that of no paper published in New England.

These journals are carefully conducted, and edited in a faith in democratic principles, but in a spirit of conciliation to all parties. As advertising mediums they are unsurpassed; penetrating, as they do, into such a variety of households scattered over the whole Union, and read as they are by all classes of the community, they furnish an opportunity for the diffusion of information which can scarcely be obtained elsewhere.

H. R. COBURN'S

OIL WORKS,

ESTABLISHED, 1842.

H. R. COBURN'S TALLOW OIL.

This Tallow Oil is almost unequalled for body and great durability in Lubricating and Burning. It has qualities peculiar to itself alone. Its great body and substance giving it a lasting and wearing power, that with a single exception, (Sperm Oil,) is unequalled Its high lubricating power being so rich in unctuous matter, that compared with most Oils, it is like cream to the skim milk. Entire absence of gummy matter, keeping Machinery cool under any rate of speed, and the different parts thoroughly and effectually oiled.

This Oil is a great favorite with Engineers, who say it is the only Oil that will answer in Steam Cylinders. For Light-houses, Signal Lights, Locomotive Head Lights, and the like, it will give a reliable and brilliant light, and do all that Sperm Oil will. The Winter Tallow Oil will stand thirty degrees Fahrenheit. When Quality and Price are considered, this Oil will be found at the head of the list, by those who combine effective service with strict economy. This Oil has been in constant use from one to two years in some of the first establishments in the country, to which reference will be given.

H. R. C. manufactures Winter Lard Oil, equal to any in the market. It is made with Ice, and will stand cold weather.

H. R. COBURN'S EXTRA OIL

Is made with care from the *best selected Lard only*. Every additional year since its introduction has added to its good reputation and standing, and for years it has been known as a *uniform standard* Oil for machinery and burning. It will stand the cold, and the attention of Grocers is particularly invited to it.

U. S. AND FOREIGN

PATENT AGENCY.

39 State Street, Boston.

SAMUEL COOPER,

Late Chief Examiner in the U. S. Patent Office,

PROCURES PATENTS IN THIS AND FOREIGN COUNTRIES.

His long official connection with the Patent Office has rendered him familiar with its rules and practice, and with the history of invention in this and other countries; and this experience with the frequent visits which he proposes making to the Patent Office, justifies him in saying that his Agency will offer to Inventors all the advantages of one located in Washington, and, in addition, those which result from a residence in the midst of mechanical and manufacturing industry.

Advice given upon all matters relating to the validity, &c., of patents, the novelty and patentability of inventions. Specifications and Drawings prepared,—Caveats filed,—Reconsideration procured of applications that have been rejected upon imperfectly prepared papers,—Cases of interference, and applications for extension and re-issue prosecuted,—and in general, all business connected with the Patent Office, transacted with care and promptness.

British and other foreign patents procured, through prompt and confidential agents in London and Paris.

Particular attention given to procuring re-issues and extensions of Patents.

He begs leave to refer those unacquainted with him to the following testimonials :—

I take great pleasure in stating that during the time I have been acting as Commissioner of Patents, Samuel Cooper Esq , of Boston, has been engaged as Solicitor, and has been in that capacity in constant correspondence and intercourse with the Office ; he has evinced a thorough acquaintance with the Patent Law, and with the rules and practice of the Office, a close attention to the interests of his clients, and a marked candor and courtesy that has rendered the transaction of business with him a pleasure. I have no hesitation in stating that I regard him as one of the very best agents for the transaction of business with this Office with whom I am acquainted.
